POSTING TITLE: Coordinator, Data Analyst
LOCATION: New York, NY

POSITION SUMMARY

The United Nations Sustainable Development Goals (SDGs) are the collective plan of global commitments required to end extreme poverty and hunger, tackle climate change and create a more socially inclusive world by 2030.

This is a significant multi-stakeholder effort which cannot be delivered by Governments and Civil Society alone. The actions, innovations and finances of the private sector are critical to our ability to deliver.

Businesses are increasingly aware of the challenge. A new survey* shows that sustainability is one of the top 3 “most concerning issues in terms of business strategy.” 65% of CEOs highlight ‘progress towards inclusive growth/sustainability’ as a major concern, just behind ‘keeping up with technology competitiveness’ at 77% and far ahead of ‘employee hiring and retention’ (31%); traditionally a major concern.

The survey also finds that CEOs are keen to enact the agenda around the SDGs; with fully 92% of respondents saying they support the SDG agenda. The issue remains how they carry out that mandate. Just 17% believe they currently have programs in place to help achieve the goals. Squaring the need to serve multiple stakeholders remains a challenge.

This is where the UN Global Compact comes in. We are the world’s largest corporate sustainability initiative with over 14,000 participating companies in 163 countries, and 70 Local Networks around the world. We enable and support companies across all sectors, geographies and sizes in their efforts to help meet the SDGs. Today fully 80% of participating companies have activities to advance the SDGs.

But we are an ambitious team, energized behind our mission of mobilizing a global movement of responsible companies and organizations to create the world we want. And we want to do much more. We need many more companies to join us in this mission to create the world we all want.

So we are building up a team of professionals supported by digital enablers to help reach out and engage more companies. The Data Analyst role will report to the Marketing Insights Manager and steward and lead data analysis and management for the Outreach and Engagement team, enabling us to manage our data professionally and better engage companies. In addition, this role will help support our insight practice, helping us to better understand companies needs so that we can enable them to succeed.
